

THE Q BOAT GUARD & HEATER

HOW TO: Connect to your Q Display with a QR code

Use the Boat Guard feature with the Q mobile app. Connect your Q Display to the app via a QR code, found in the Q Display's System

KEEP YOUR BOAT SAFE IN THE DOCKS

- ✓ Antitheft alarm **for Q 2 Series Displays.**
- ✓ Found in Q Experience, Buster Q, and Yamarin Q mobile apps.
- ✓ Guard mode is **on when the Q Display is not** - Keeps your boat safe in the docks.
- ✓ Get notifications on all alarms immediately to your phone. All status updates will be recorded in the guard log.

ANTITHEFT ALARM FOR YOUR BOAT

Turn guard mode on/off.

Locate stolen Q Display or boat

With *geofence* you can stay up to date with your Q Display's location. When your Q Display isn't on, geofence will notify you if your boat moves over 50 meter of where it is parked.

Water in the bilge

Bilge level will alarm you in case your boat is filling with water.

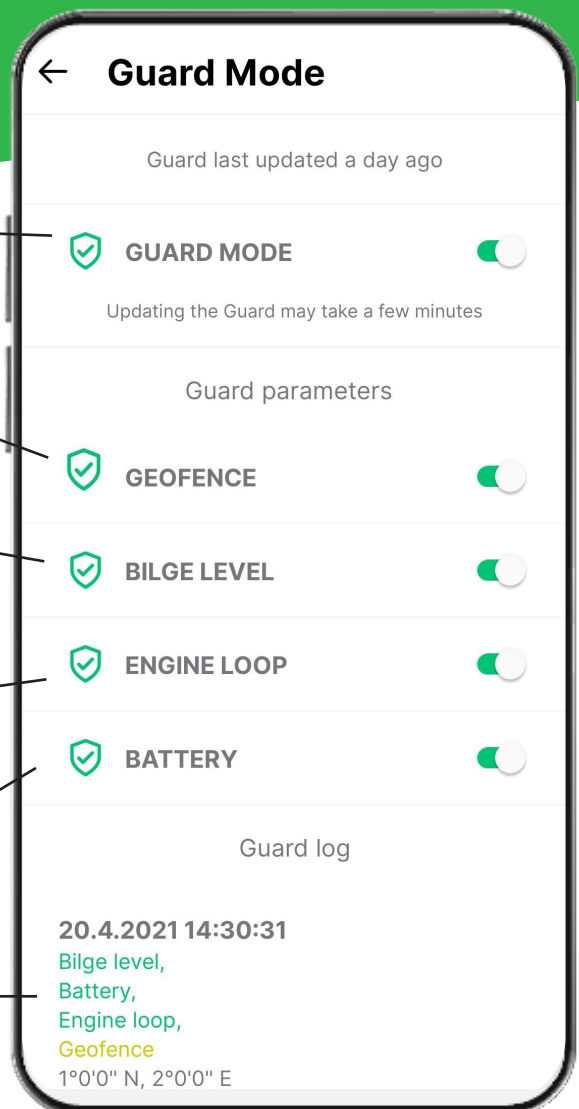

Engine theft

Engine loop keeps an eye on your engine. Get an alarm to your phone straight away in case of engine theft!

Battery theft

Battery feature will alarm you if your boat's battery runs out, or if the battery or your Q Display is stolen.

All changes in guard mode can be seen in *Guard log*.

USER INFO

After first connection, the guard mode will be automatically activated when you turn your Q Display off. Please note, that the guard mode cannot be active when the Q Display is on.

You'll get a notification every time your boat or Q Display might be in danger and you need to check in. Make sure to switch guard mode off when doing maintenance work.

All status changes in the guard will be saved in the guard log.

NOTE. The Q Guard only works in Q Display 2 Series.

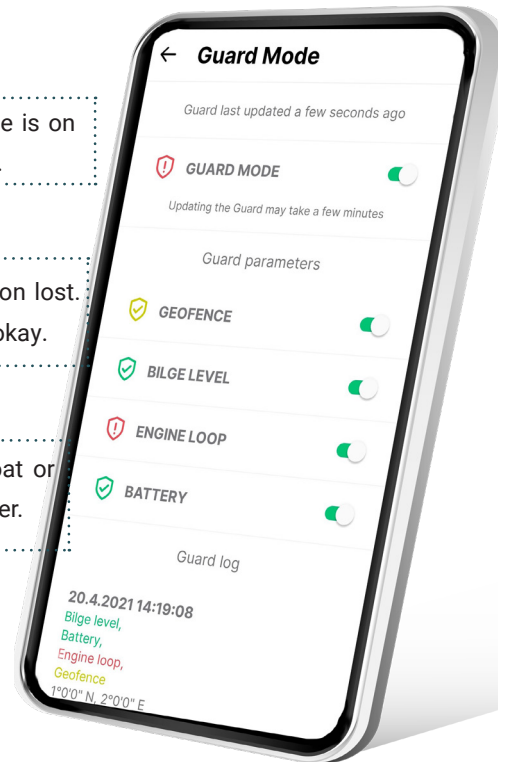

All good! Guard mode is on and your boat is safe.

Connection or position lost. Check everything is okay.

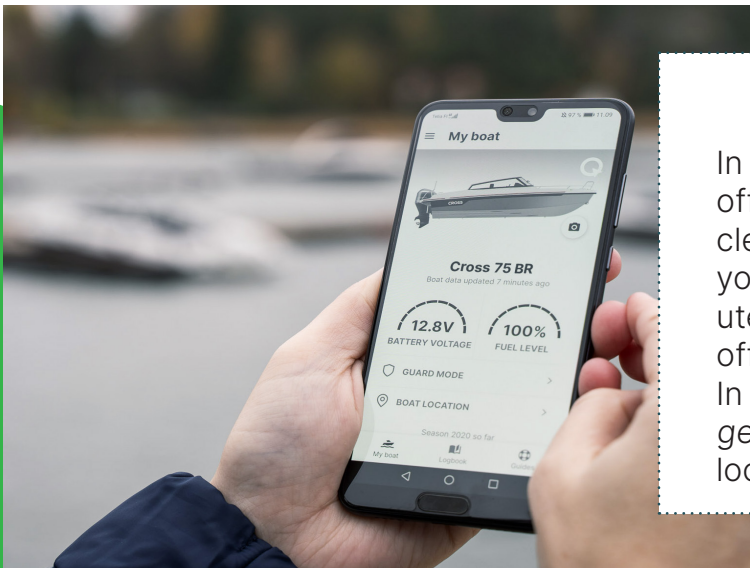

Attention needed. Your boat or Q Display might be in danger.

KEEP YOUR GUARD UP

In case of engine theft a loud siren will go off in your boat. It will ring in 1 minute cycles until the guard mode is turned off from your mobile app. It can take up to 10 minutes for the siren to die after switching it off.

In case of boat or Q Display theft, the geofence feature will show you your boat's location in 50 meter accuracy.

Q MOBILE APP'S REMOTE HEATER

- ✓ Switch your boat's heater on remotely with Q Mobile app's heater feature. Step right into a warm boat!
- ✓ Works in boats with factory-installed Webasto heater and a Q Series 2 Display.
- ✓ Set a timer for up to 6 hours. The timer and heater turn off automatically when you turn your Q Display on.
- ✓ To extend the duration of the heater turn it off and on again

Make sure that your mobile app's brand matches your Q Display!
