RELEASE NOTES:
Fall 2023

The Fall update 2023 is an update that is focused on quality-of-life improvements for the coming season! The biggest single new feature is the introduction of autopilot support for the Q Display, this will make boating better than ever.

New features

Autopilot Support

Q Display now supports Autopilot Track Mode on Raymarine NMEA2000 Autopilots! Just start the navigation on the Q Display and let your autopilot do the driving. NOTE: requires installed autopilot system.

Cross Track Error (Next waypoint)

To next waypoint dashboard has been updated to show more information, especially for use with autopilot.
Chart > Chart Settings > Dashboard > Navigation > Cross Track Error

Trim Tabs Dashboard

Show the status of your NMEA2000 compatible Trim tabs directly in the Dashboard Widgets.
*Chart > Chart Settings > Dashboard > Peripherals > Trim Tabs*

Audio controls

Bluetooth tracks and radio station can now be changed in the Dashboard Widget.
Chart > Chart Settings > Dashboard > Settings shortcuts

Quality-of-Life Improvements

IP Camera flip
Camera views can now be flipped. Especially for use with rear cameras.

Trim resolution
Show trim resolution can now be changed by the user. Selections are: 1, 5, 10, 20.
Settings > Boats settings > Trim Resolution

Radar
Improved radar image quality and increased radar offset setting.

Trim Calibration
Trim calibration now shows negative values as well as values over 100.

Utility menu
Improved Binoculars, Bird View, and Range panning lengths.
- Tapping button once activates function for three seconds, before returning to normal
- Holding button and moving finger up or down changes the panning

COG and Heading vector
Length of COG and Heading vector can now be changed in to duration or distance. Available options: *Off, 1km, 10km, 100km, 1min, 5min, 10min, Fullscreen*
Chart > Chart Settings > COG vector / Heading vector

New languages added
New languages added: Italian, Spanish, Polish and Simplified Chinese.
