RELEASE NOTES

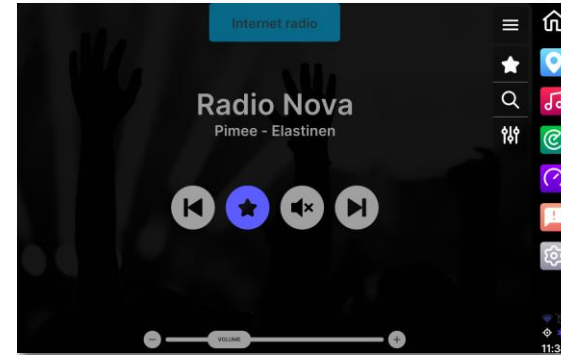

New Features

Windy

See detailed weather forecast from Windy. Activate the subscription from Q Connected or Q Connected+ subscription.

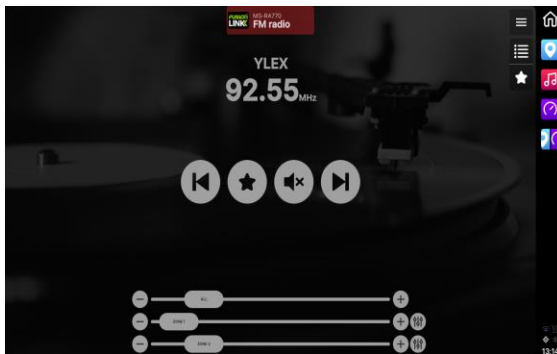

Open Windy application from *Home > Windy*

Internet Radio

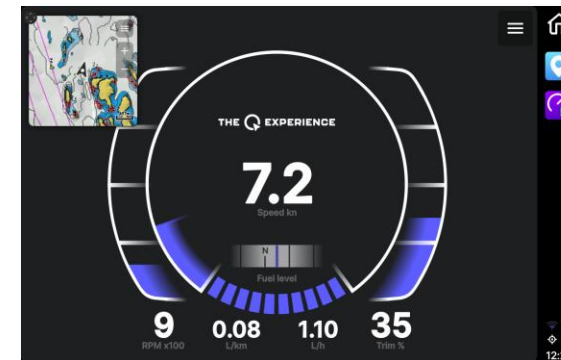

Internet Radio is now available. Data from a Q Connected+ subscription or WIFI.

Listen to any radio station, anywhere in the world!

Fusion Link

Users with an external Fusion audio system can now control it directly on the Q Display!

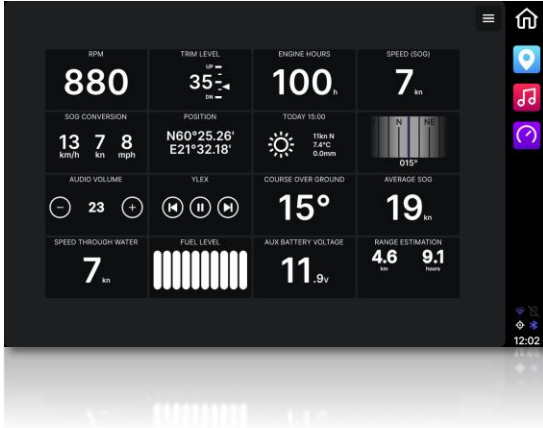

Picture-In-Picture

Moveable Picture-In-Picture mode is now available. Use for example Map as a small view!

Create a Picture-In-Picture view from *Home > Create View > Picture-In-Picture*

New Features

Instrument panel

New dashboard layout: Instruments panel.

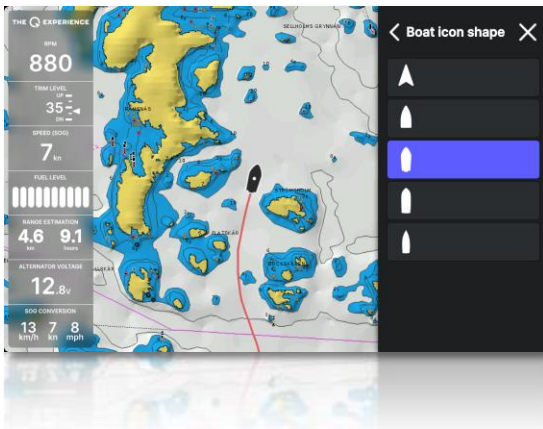

Choosing the option *Instruments* in the *Dashboard menu > Main gauge* will remove the graphical dashboard and only show user added widgets.

Customizable dashboard background

The dashboard background can now be changed!

Choose a custom background in: *Dashboard > Menu > Background*

Customizable Boat icon

The boat icon on the chart can now be changed by the user.

Change the boat icon in: *Map > Menu > Boat icon shape*

New Music App

The Music application has gotten a new look!

The new music application brings all the music settings closer and has a modern look.

New Features

Anchor alarm

Enable and disable in the Chart menu.

Alarm shows on screen when the vessel is outside the defined area by a radius.

The alarm output on Q Guard cable is activated by the alarm. The alarm is also sent to the mobile app via 4G.

Settings > Navigation > Anchor alarm radius

Subscription view

Subscription view is now visible in Info. View your active features easily from there.

Info > Subscriptions

Depth sensor offset

Depth reading can now be offset to show depth from the waterline or the bottom of the keel.

Settings > Boat settings > Depth offset

New settings in Navigation

Added new settings:

- GPS Measurement Rate (Hz 1 / 10)
- Position interpolation
- Internal COG stabilization
- Anchor alarm radius

Settings > Navigation

Volume Boost

Selection of the audio volume contra quality. Boost (4) or Quality (Off)

Settings > Audio settings > Volume boost

Lay lines on the chart

Sailing lay lines (course on opposite tack) are now shown on the chart in real time! Activate from chart settings.

Map > Chart settings > Lay lines

New improvements

New info in pinch measurement

Added new info in pinch measurement. Now it has length, time, speed, fuel, fuel per distance, and bearing.

Map > Two fingers on screen

Service info moved

Service is now under *Settings*, instead of being under *Settings > Boat settings*. This helps with finding the service info.

Change heading & COG vector length

The length of the heading and COG vector can now be customized.

Map > Chart settings > Heading vector length

Screensaver time

Screensaver activates when boat is not moving and screen has not been touched.

Select time for when Q's screen backlight shuts down from *Settings > Display settings > Screensaver time*

New NMEA PGNs added

Added new NMEA2000 PGNs for electric propulsion.

Boat icon changes color in dim brightness

Boat icon changes color in dim brightness conditions to be more visible. This helps with visibility issues.

The change is automatic.

Shutdown after inactivity

When shutdown is cancelled by the user, select time for when Q automatically shuts down.

Settings > Display settings > Auto-Shutdown After Inactivity

New languages

Added language support for:

- Dutch
- Polish
- Chinese
