- New user onboarding
- New integrations
- New fishfinders
- Other improvements...

Q App

- Notification center
- Important system information
- New languages
- Subscription for limitation areas in Norway
- Other improvements...

New dashboard

New look and feel

The redesigned dashboard offers a modern, fresh interface that enhances your boating experience.

New dashboard

Customizable bottom and middle widgets

The dashboard widget panels can now be tailored to display the most relevant data for you, both in the middle section and in the bottom panel.

## Multi-engine support

Enhanced protocol support allows users to configure and monitor up to five engines, ensuring seamless multi-engine integration.

New widgets

New widgets have been added to support multiple drive and house batteries, as well as to display rudder angle.

Enhanced chart application

New chart overlay design

The updated chart application improves navigation by integrating essential engine data directly into the chart view. Users can easily monitor key metrics while staying focused on their route.

The interface also allows easy switching to full-screen chart mode when more visibility is needed.

Enhanced chart application
Overlay gauges and customizable widgets

Keep essential engine and navigation data visible on top of the chart, and customize widgets to show exactly what matters to you.
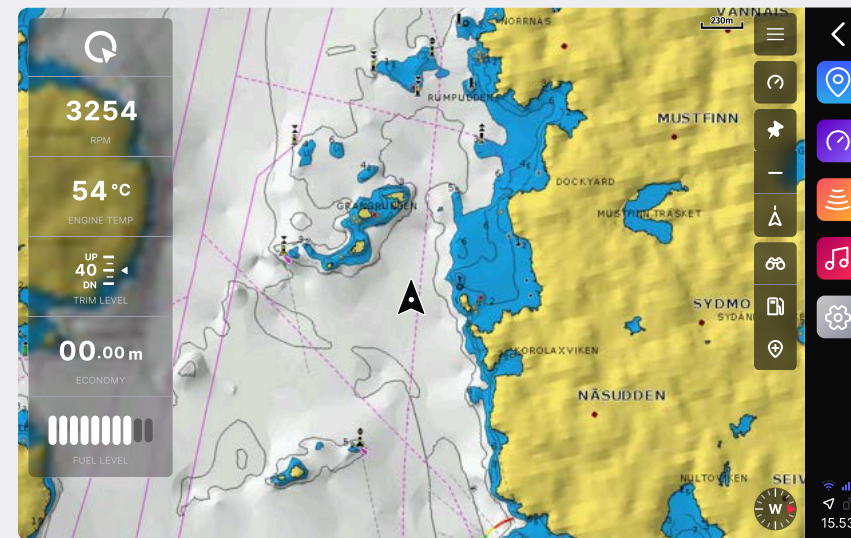

Easily switch to full chart

Tap the map at any time to hide overlay gauges and switch to a full-screen chart view. Easily toggle between views to stay focused on route planning and navigation.
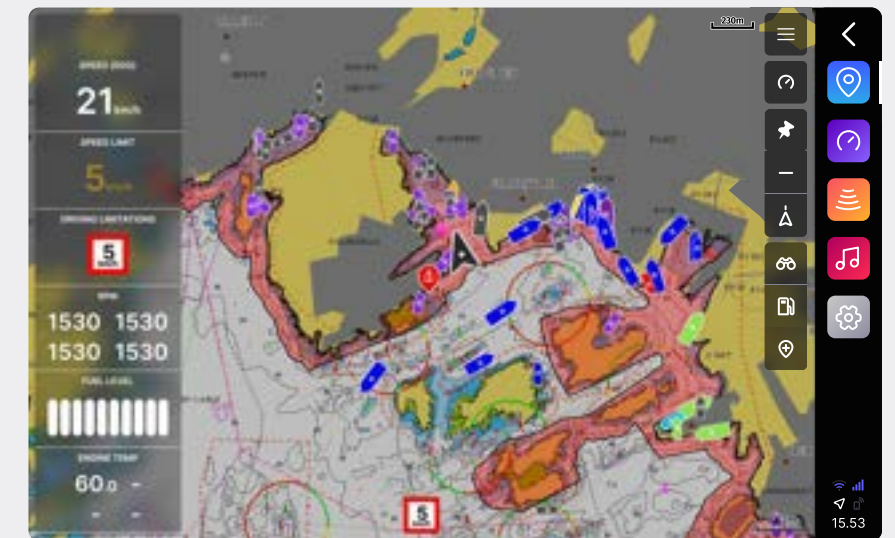

Limitation areas for Norway

The subscription-based limitation area feature includes now the Norwegian speed and access restrictions directly on the chart.

Enhanced chart application

Disable overlay gauges
Lock the expanded chart view and keep the gauges hidden

Switch chart orientation
Switch between head-up and north-up modes

Minicompass
Red triangle: North
Letter in the middle: Your current heading

Anchor alarm improvements
Adjusted alarm handling to reduce false alarms

AIS functionality improvements
Improved tracking and handling of AIS targets

New user onboarding

Get onboard with Q

The updated onboarding flow provides a guided setup experience, ensuring users configure essential settings such as language, draft, engine type, and fuel tank capacity right from the start.

It also walks users through downloading the Q app and linking it to the display for seamless connectivity.

Other improvements

New scale bars for Windy

A new wind scale bar has been added, along with fine-tuned display settings for improved readability in different conditions.
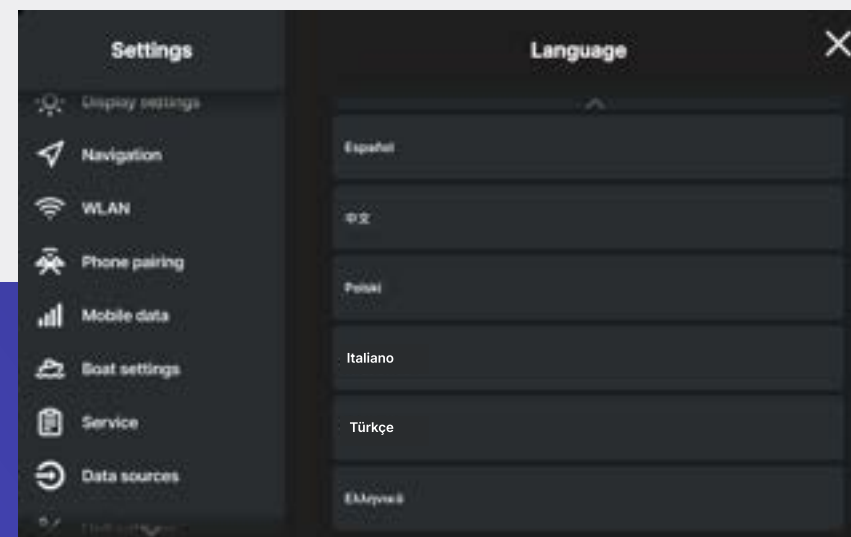

Support for Italian, Turkish and Greek languages

Italian, Turkish, and Greek translations have been fully integrated, along with refinements to existing language sets.
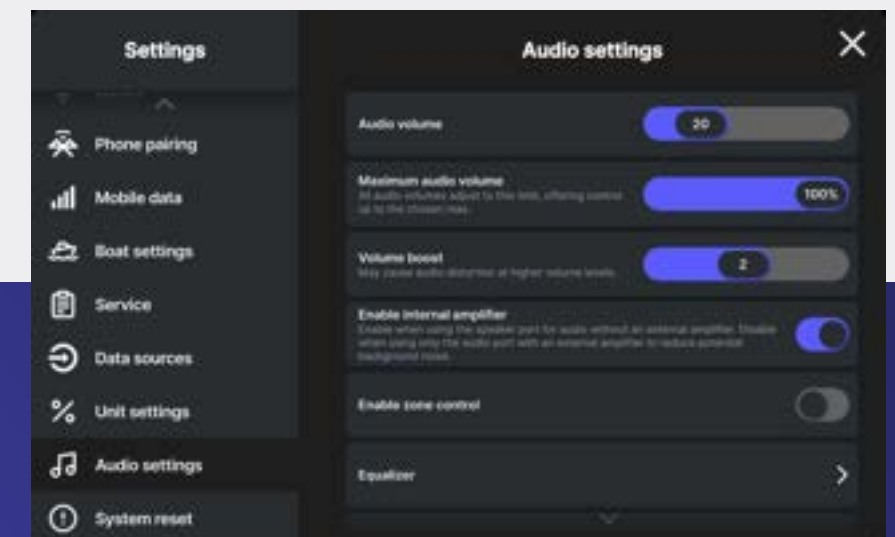

Music & media updates

You can now disable the internal amplifier and control volume boost. The music app also fully supports 16" displays in picture-in-picture mode, and internet radio scanning has been optimized for better station detection.

Other improvements

Refreshed app icons

The side panel application icons have been given a refreshed look and feel.

Support for multiple Q Digital Switches

Among other improvements, it is now possible to add multiple Q Digital Switches to a single Q Display, increasing the number of digital switch appliances supported as needed.

Q Digital Switch switchbank steering

You can now control Q Digital Switch appliances using external physical switchbanks, offering more flexibility for traditional-style controls.

Integrations

The Q system now supports even a wider range of third-party integrations, enabling smooth communication with propulsion, power management, stabilization, and control systems.

Piktronik, NT Systems and RAD dashboards available via partners

Fishfinder options
AIRMAR® for ⓆⓆ
Airmar all-in-one CHIRP fishfinders

Simply plug them into the display, and they'll deliver crisp bottom details and clear fish target images. Available in both transom and thru-hull mounting options.

Medium CHIRP frequencies: 95-155 kHz
Depth range: 0.5 - 200 meters or 0.5 - 457 meters (1 kW)
Features: Depth, water temperature, bottom tracking, fish detection, "auto" mode for sensitivity, range and noise cancellation, zoom, and split screen.

SYSTEM INFORMATION

Q Display update needed

Your Q Display is an intelligent, internet-connected navigation system that is continuously developed to enhance system stability, security, user experience, and new features.

To continue enjoying the full benefits of your system, your Q Display needs to be updated to the latest version by the end of the May 2025.

Starting in June, displays that have not been updated to the latest software version will no longer be able to connect to the internet, their connection to mobile applications will be lost, and they will no longer be able to receive updates.
